Brain & Body Health Care for UBCP/ACTRA Stunt Performers

At the Surrey Neuroplasticity Clinic, our mission is to positively impact 1 billion brains around the world. Combining innovative clinical research, our proprietary cognitive assessment medical device with our inter-disciplinary neurological rehabilitation clinic, we set the standard for quality of care when it comes to head injuries and concussions.

Working with the Stunt Performers of BC to provide early-access assessment and care following a suspected head injury will allow us to help these industrial athletes recover better and return to work when it's appropriately safe, with decisions supported by objective physiological data.

Services Available to Stunt Performers

Stunt Performers are invited to the Surrey Neuroplasticity Clinic for expedited access to assessment and rehabilitative services. We promise to put you at the top of the queue, and provide services as quickly as possible.

1. [Head Injury and Suspected Concussion Rehabilitation](#)

- ❖ Direct access to a Physiotherapist for post-injury assessment and prescription of a treatment plan
- ❖ Services as part of the treatment plan include: Physiotherapy, Kinesiology, Occupational Therapy, Registered Massage Therapy and Registered Clinical Counselling
 - Innovative, evidence-based head injury assessment and treatment interventions are incorporated into our best practices for care
- ❖ Stunt Performers are booked with providers at the Surrey Neuroplasticity Clinic within 3 days of referral
 - If Stunt Performer has a WCB claim number in that 3 day period, we will be able to bill WCB directly through the Physiotherapy RFP we have secured with WCB
 - Doctor referral will be required
 - If Stunt Performer does not have a WCB claim number at time of assessment:
 - May pay privately and be responsible for submitting receipt to WCB or individual benefit plan for reimbursement
 - No doctor referral required unless necessary for benefit plan reimbursement

2. [NeuroCatch® Benchmarking](#)

We invite all Stunt Performers to undergo benchmarking - our form of establishing baseline measures using our proprietary NeuroCatch® cognitive assessment, which provides objective and repeatable physiological measures reporting on personalized *brain vital signs*. This allows us to reference back to the benchmark data in the event of an injury, and ensures a more comprehensive and customized approach to rehabilitation

- ❖ No doctor referral required unless necessary for benefit plan reimbursement

SURREY NEUROPLASTICITY CLINIC
PHYSIOTHERAPY AND BRAIN HEALTH. OPTIMIZED.

3. Expedited Treatment for Musculoskeletal Injuries

- ❖ Stunt Performers will be provided expedited services for musculoskeletal injuries
- ❖ Services include: Physiotherapy, Kinesiology, Registered Massage Therapy, Occupational Therapy and Registered Clinical Counselling
- ❖ Accessibility means:
 - WCB Claim
 - Doctor referral and WCB claim number required at time of booking
 - If no WCB claim number, Stunt Performer may be responsible for submitting receipt to WCB for reimbursement
 - Private Pay
 - No doctor referral required unless necessary for benefit plan reimbursement
 - Stunt Performer responsible for submitting receipt to individual benefit plan for reimbursement

4. Stunt Performers must communicate through their dedicated representative at the Surrey Neuroplasticity Clinic to schedule their assessment appointments and receive expedited care

Dedicated Representative:

Balraj Dhillon
